

OPTIMIZER

by **DASH4**

- ✓ Optimizer Geomet Brake Rotors features O.E. style vane designs.
- ✓ Symmetric and smooth vane castings provide proper heat transfer and thermal efficiency, resulting in superior braking and safety.
- ✓ 100% fully coated throughout the entire rotor including the vane configuration.
- ✓ All brake rotors are 100% inspected for balance and are corrected if necessary with our state of the art mill-balance process.
- ✓ Pretreatment – High Pressure cleaning by special solution to improve rust resistance.
- ✓ Modern Silver coating, the best look for open wheels.
- ✓ Superior protection from rust and corrosion, even in extreme conditions.
- ✓ Automated coating with environmentally friendly material. (Chromium-Free Zinc/Alumina)
- ✓ Designed with SAE J431 G11H18 Metallurgy Standards.
- ✓ Multi-Stage Q.C. Process To Ensure Parts Meet Dimensional And Weight Specifications.
- ✓ Coating is safely swept away clean by the friction material with no harmful effects.
- ✓ Baking Under strict temperature control to cure the adhesive force and ensure the rust resistance.
- ✓ Ready to install, no degreasing of oil or modifications are necessary.
